

A detailed topographic map of a mountainous region. The map features numerous contour lines indicating elevation. A prominent river flows through the center, with several smaller tributaries. Various colored overlays are present: red lines for major roads or boundaries, purple lines for secondary roads or boundaries, green areas for forests or parks, and orange/brown areas for urban or developed land. A dashed red line runs parallel to the river. A north arrow is located in the top right corner. The map shows a mix of steep slopes and flatter valleys, with some small settlements or clusters of buildings visible.
